Application/Control Number: 10/651,105

Art Unit: 2881

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-26, 54-62 drawn to a projection type transmission microscope classified in class 250, subclass 311.

II. Claims 27-36, and 42-43 drawn to a manufacturing apparatus including a defect inspection apparatus therein, classified in class 250, subclass 310.

III. Claims 44-53 and 63-65, a reflection type electron microscope, classified in

class 250, subclass 311.

The inventions are distinct, each from the other because of the following reasons: Inventions I and III are unrelated.

Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

In the instant case invention I uses a transmitted electron beam projected onto a detector to form an image. It does not comprise reflective type electron microscope, as does invention III.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed

Application/Control Number: 10/651,105

Art Unit: 2881

because the semiconductor manufacturing apparatus is operative without a transmission electron microscope, for example it could use an optical microscope.

The subcombination has separate utility as a stand-alone inspection device (a transmission electron microscope).

Inventions II and III are related as combination and subcombination. In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the semiconductor manufacturing apparatus is operative without a reflection type electron microscope, for example it could use an optical microscope.

The subcombination has separate utility as a stand-alone inspection device (a reflection type electron microscope).

Invention III is distinct because it does not require either invention I or invention II for its operation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Michael Huppert to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1. 143).

Art Unit: 2881

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR I .48(b) and by the fee required under 37 CFR 1. 17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James J. Leybourne whose telephone number is (571) 272-2478. The examiner can normally be reached on M-F 9:00-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John R Lee can be reached on (571) 272-2477. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
